A compressor is a mechanical device that increases the pressure of a gas by reducing its volume. An air compressor is a specific type of gas compressor. Compressors are similar to pumps: both increase the pressure on a fluid and both can transport the fluid through a pipe. As gases are compressible, the compressor also reduces the volume of a gas. Liquids are relatively incompressible; while ...

Kobelco has manufactured reciprocating compressors since 1915 and now has an installed base of more than 2,300 units around the globe. Kobelco reciprocating compressors (API 618) have been serving in a wide variety of heavy industry applications: oil refining, natural gas, petrochemical and energy.

Watch our video to see how our integrally-gearred centrifugal compressors are built with integrally-gearred technology, the industry's most compact and efficient compressor design. Offering accurate process control, top reliability and excellent efficiency, they are found at the heart of key processes around the world.

Copeland ZR COPELAND SCROLL, COMPRESSORS 3 FEATURES • Ultra High Efficiency • High Heat Pump Capacity Due to Nearly 100% Volumetric Efficiency • Wide Selection Range 60 Hertz 18100 to 81500 BTUH 4560 to 20500 KCALH 5300 to 23900 WATTS • R22 and R407C Refrigerants • Fewer Moving Parts • Rugged Design and Proven Durability • Compliance Feature Offers Unprecedented Liquid

### **THE INDUSTRY BREAKTHROUGH - Desco Energy**

Centrifugal compressors, sometimes called radial compressors, are a sub-class of dynamic axisymmetric work-absorbing turbomachinery.. They achieve a pressure rise by adding kinetic energy/velocity to a continuous flow of fluid through the rotor or impeller. This kinetic energy is then converted to an increase in potential energy/static pressure by slowing the flow through a diffuser.
