

### **microstrip patch antennas a pdf**

A patch antenna is a type of radio antenna with a low profile, which can be mounted on a flat surface. It consists of a flat rectangular sheet or "patch" of metal, mounted over a larger sheet of metal called a ground plane. They are the original type of microstrip antenna described by Howell in 1972; the two metal sheets together form a resonant piece of microstrip transmission line with a ...

In antenna theory, a phased array usually means an electronically scanned array, a computer-controlled array of antennas which creates a beam of radio waves that can be electronically steered to point in different directions without moving the antennas. In an array antenna, the radio frequency current from the transmitter is fed to the individual antennas with the correct phase relationship so ...

In this present work, the author has presented Sierpinski Bow-Tie antenna which is meant for the perspectives of triple bands. The designed antenna as made to resonant from 2 GHz to 11 GHz focusing on covering the aspects of 2.211-2.348 GHz, 4.777-5.150 GHz and 8.874-10.12 GHz. As a result, it produces good coverage of applications, gain of 10.29 dBi at highest frequency level, broadside ...
