

spell or high water pdf

A drought is a natural disaster of below-average precipitation in a given region, resulting in prolonged shortages in the water supply, whether atmospheric, surface water or ground water. A drought can last for months or years, or may be declared after as few as 15 days. It can have a substantial impact on the ecosystem and agriculture of the affected region and harm to the local economy.

Drought - Wikipedia

White frost. White frost is a solid deposition of ice that forms directly from water vapour contained in air.. White frost forms when there is a relative humidity above 90% and a temperature below -8°C (18°F) and it grows against the wind direction, since air arriving from windward has a higher humidity than leeward air, but the wind must not be strong or it damages the delicate icy ...

Water storage in oceans: Saline water existing in oceans and inland seas The ocean as a storehouse of water. The water cycle sounds like it is describing how water moves above, on, and through the Earth ... and it does. But, in fact, much more water is "in storage" for long periods of time than is actually moving through the cycle.
