

the conduction system of pdf

The electrical conduction system of the heart transmits signals generated usually by the sinoatrial node to cause contraction of the heart muscle. The pacemaking signal generated in the sinoatrial node travels through the right atrium to the atrioventricular node, along the Bundle of His and through bundle branches to cause contraction of the heart muscle.

Electrical conduction system of the heart - Wikipedia

Thermal conduction is the transfer of heat (internal energy) by microscopic collisions of particles and movement of electrons within a body. The microscopically colliding particles, that include molecules, atoms and electrons, transfer disorganized microscopic kinetic and potential energy, jointly known as internal energy.

130 Pearce, Pa 4 rick, Vaughan This is often written: $\sigma = pe\hat{\mu} p (5)$ where $\hat{\mu} p$ is the carrier mobility of holes in $\text{cm}^2 \text{V}^{-1} \text{s}^{-1}$. This equation shows the dependence of conductivity on both carrier concentration and mobility. A similar equation applies to
