"Free and open-source software" (FOSS) is an umbrella term for software that is simultaneously considered both Free software and open-source software. FOSS (free and open-source software) allows the user to inspect the source code and provides a high level of control of the software's functions compared to proprietary software. The term "free software" does not refer to the monetary cost of the ...

FreeBSD has a software repository of over 26,000 applications that are developed by third parties. Examples include: windowing systems, web browsers, email clients, office suites and so forth. In general, the project itself does not develop this software, only the framework to allow these programs to be installed, which is known as the Ports collection.

Stallman introduit alors la notion de copyleft, et formalise ainsi celle de logiciel libre. Il crée la Free Software Foundation en 1985 pour assurer la protection légale du projet, dont la mission, plus générale, représente un projet proprement politique. La FSF commence par financer des programmeurs pour accélérer les premiers développements, mais la construction communautaire se ...
