Tensile strength is a measurement of the force required to pull something such as rope, wire, or a structural beam to the point where it breaks.. The tensile strength of a material is the maximum amount of tensile stress that it can take before failure, for example breaking.. There are three typical definitions of tensile strength: Yield strength - The stress a material can withstand without ...

A car is a road vehicle used to carry passengers. It is also called an automobile, which comes from the Greek word "auto" and the French word "mobile". This name means "self-moving", as cars do not need horses or other external sources of power to move. Cars usually have four wheels and get their power from an engine. Millions of cars were made during the 20th century
