These volumes contain an enormous amount of data and information for thermophysical properties on more than 5,000 different materials of interest to researchers in government laboratories and the defense industrial establishment.

Thermophysical Properties of Matter - The TPRC Data Series

This is the searchable, electronic version of the Thermophysical Properties of Matter, the TPRC data series. It is available in a Web-based format. The database is continually updated and expanded. The TPMD contains over 5,000 materials categorized into 85 material groups, 107 properties, and over 51,000 data curves.

Thermophysical Properties Of Matter The Tprc Data Series

In Section 3, thermophysical properties of coolants including some gases, water (H₂O, D₂O), liquid metals, their vapours and alloys (Na, NaK, Pb, PbBi, Li and others) are addressed. The data on the properties of liquid metals and alloys are based on the review [10], properties of. 2 Vapours in Ref. [11].

Thermophysical Properties of Materials

Thermophysical Properties Experimental determinations of reliable thermophysical properties are difficult. In the solid state, the properties recorded in the technical literature are often widely diverging, conflicting, and subject to large uncertainties. This problem is particularly acute for materials in the mushy and liquid state.
